Hazardous Location LED Linear Luminaires

Product description

This hazardous location LED luminaire features extremely sturdy circuit devices and fully sealed electrical components. In addition to being able to withstand severe vibration and shock resistance, it can also prevent any corrosion that may lead to electrical failure. Therefore, the explosion-proof linear lamp has long service life, low maintenance requirements and low energy consumption.

Copper-free aluminum alloy body powder sprayed for increased durability and aesthetics. The combination of special heat dissipation design and LED technology enables the lamp to achieve an excellent 50,000 hour rated life and 80% lumen retention rate. Linear lights in hazardous areas also have multi-voltage capabilities. They can operate at 100-277 VAC, 50/60Hz without additional special ballasts.

A variety of lamp combinations can meet different lighting needs, up to 72,000LM.
