DIMENSIONS

- LENGTH 18/2 wire: 96 in (243cm)
- LENGTH wire from barrel plug: 39 in (1m)

WHAT'S INCLUDED

NS-DW1236

- Direct wire kit
- 2 Cushion clamps 1.5" diameter (38mm)
- Built-in voltage regulator
- 1 fuse (3-amp glass)
- Instruction manual

NIGHTSTICK
NS-DW1236

Input Voltage: 12VDC-36VDC
Output Voltage: 12VDC
Output Current MAX: 2A
Fuse: 3A 250VAC 5X20mm

The NS-DW1236 wiring kit is recommended for the permanent installation of Nightstick product chargers in commercial first responder vehicles. The kit steps down the voltage from 36v to 12v while protecting the product from startup spikes and unexpected surges. An inline 3-amp fuse provides additional protection from overcharging and wiring damage caused by abrasion.
