

CLEARTRAK NRX

INTRINSICALLY SAFE HEADSETS

ClearTrak NRX is the next generation of industrial-grade intrinsically safe headsets for high-noise environments.

Combining contemporary design with proven OTTO quality, the ClearTrak NRX is a comfortable, reliable headset providing clear audio and superior hearing protection. Now available in over-the-head, behind-the-head, and helmet-mounted options, ClearTrak NRX is ideal for occupations where essential instructions and safety warnings must be clearly heard.

FEATURES:

- + SNAP-IN EASY CHANGE EAR SEALS
- + UPGRADEABLE EAR SEALS
- + RUGGED COILED CABLE
- + TACTILE PTT ON EARCUP
- + HELICAL BOOM FOR CONSISTENT PLACEMENT

- + INTRINSICALLY SAFE/ATEX CERTIFIED
- + MICROPHONE SENSITIVITY RATING:
-47 DBV TYPICAL
- + OPERATING TEMPERATURE RANGE:
-30 C TO +75 C
- + 3-YEAR WARRANTY

WHAT IT CAN DO: The new helmet-mounted ClearTrak NRX (left) provides 20 dB of hearing protection and conveniently swings off-ear to the back the hard hat when not needed.

Intrinsically safe and ATEX-rated, ClearTrak NRX is certified for use in hazardous areas that require a headset, providing an NRR of 24 dB for over/behind-the-head models and 20 dB for the helmet-mounted option. ClearTrak NRX satisfies many OSHA compliance needs.

The ClearTrak NRX is made for work. The rugged coiled cable stays out of the way, and the durable helical boom is ready for any on-the-job adventure and replaceable if it gets too adventurous - or if it's slammed in a truck door. Earcup-mounted push-to-talk (PTT) is easy to reach and provides tactile feedback for use with gloves. Finally, easily replaceable ear seals snap in for true comfort and longevity.
